Role of Computer in Education and Accountancy

Report on Whole Day Seminar on Role of Computer in Education & Accountancy IT Cell, West Goalpara College

Date: 10.06.2019

Every year Information Technology (IT) Cell of the West Goalpara College organizes of various programmes such as Seminar, Workshop to develop digital skills of staff as well as students.

Accordingly, during this current year, the committee organized Seminar Program on "Role of Computer in Education & Accountancy" on 10.06.2019 at Digital Room where Resource person was Rajib Sarma, Assistant Professor in Computer Science, Goalpara College, Goalpara. There were 33 participants participated including staff and students. The Resource Person delivered his valuable speech on the role of computer in education and accountancy how the computer helps in accounting system is the core of its financial management, as it processes all transactions within the organization. A computerized accounting system is a software application that automates financial records and reporting processes to make them faster, more accurate, and easier to manage. It reduces the manual entry of data, eliminates redundant operations, and reduces accounting error risk with built-in controls. An accounting system is a set of procedures and record-keeping systems for managing the financial and operational activities of an organization. Basically, it's a method for tracking and managing the business's finances.

Afterwards the computer teacher of the college organized a practical session of the present members to update their computer uses.

The programme came to an end successfully.
