

Institutional Distinctiveness **(2023-24)**

West Goalpara College's dedication to delivering high-quality instruction, encouraging research and innovation, cultivating a dynamic cultural environment, and interacting with the neighbourhood are what make it unique as an institution. The college has a specific institutional identity that makes it stand out from other universities in the area. The college recognises the significance of its part in giving the aspirations of those in its immediate vicinity form. The institute wants to give students the chance to learn the disciplines they need to in order to obtain the degree they want. Students from groups that are socially disadvantaged, such as the tribal and minority communities, are given a platform by the college. Keeping in view the distinctive vision of our college, it has the capacity to accommodate both girls and boys in the hostels who come from “char “areas and other backward places. To promote inclusive education, and to maintain universal brotherhood the college celebrates all religious festivals like Saraswati Puja, Tithi of Sankardeva, Biswa Nabi divas, Viswa Karma Puja etc. The faculty members of the College have encouraged the students to visit the college library to create a reading culture in the student community. Apart from other socio-economic areas our faculty members provide extra attention to the overall development of the students. To impart quality education the teachers of the college also keep themselves updated in the field of academics by attending various types of seminars, faculty development programmes, short-term and refresher courses etc. Our college has been set up with the cooperation and support of the community to address the need for providing quality education to economically backward communities. The meritorious but economically backward students of the West Goalpara area were unable to access quality education due to lack of transportation and the unaffordable cost of moving to given to educating girls and in 1981 it was unthinkable, for the girls to be allowed to go outside. The College was established by a prominent educationist to impart education to socially -economically backward societies, especially to girls/women. Those girls coming from the char areas are provided with a safe and secure women/girls’ hostel where they are provided with all the facilities and fulfil their dreams. Most of our students do not have exposure to sports and cultural fields in spite of having talent and potential in these areas. The college provides a platform for such talented students, the college has taken initiatives for providing facilities for sports and as well as in the cultural field.
